SUPPLYING A COMPLETE RANGE OF METALS & PLASTICS TO HIGH TECHNOLOGY INDUSTRIES

Smiths Advanced Metals is a leading supplier of metals and plastics into aerospace, defence, oil & gas and other high technology industries around the World. Our expertise lies in making the highest quality materials available in a fast, cost effective and convenient package. We offer a complete supply solution to all of our customers from small, niche, engineers right through to the biggest multi-national enterprises.

Established in 1989 we have continued to grow becoming a world class supplier to industries of all types and sizes providing a reliable single source for all metals and plastics. All our products are of the highest quality and we have facilities for physical preparation of all our materials to as close as possible to a customer's final requirement.

Speed of response is a critical element of our service package. We distribute our materials in the UK through a network of local service centres each of which is capable of holding its own customer specific stock.

We manage worldwide supply chains and have the buying power and resources to give the best possible supply package to all our customers.

- A complete range of metals & plastics to many international standards
- Partnership agreements with the world's best metals & plastics producers
- Over 40 approvals from the UK's top aerospace and defence companies
- Complete supply chain management solutions
- A fully accredited in-house materials testing laboratory with qualified metallurgists
- A distribution network of 15 service centres across the UK
- Comprehensive cutting and processing facilities
